Filters: There's a lot of them

- Filter affects the pixels of an image layer
- Grouped into categories
- Filter Gallery: can see what certain filters will do
- Destructive edits! Always work on copy of layer.

Filter last used -

Third party plug-ins

Third pa

plug-ins

- Companies other than Adobe make filters for Photoshop; they are listed under the standard Photoshop filter set
- Some of these filters replicate combined effect of multiple PS filters into one filter

	Filter 3D View Window	w Help
	Last Filter	ЖF
	Convert for Smart Filters	
	Filter Gallery	
	Adaptive Wide Angle	℃ ℃ ೫А
	Camera Raw Filter	<mark></mark> ዮжል
	Lens Correction	 ዕ <mark>ж</mark> R
	Liquify	<mark>ዮ</mark> װא

Third party plug-ins

• You use third party filters because they can save you time

	Filter	3D	View	Window	Help
	Last	Filter			ЖF
	Conv	/ert fo	r Smart	Filters	
	Adap Cam Lens Liqui	era Ra Corre fy	ry Vide An aw Filte ection Point	r	て

My Commonly use filters

- These are the filters that I typically use (YMMV)
 - Blur: Gaussian, Motion, Radial
 - Distort: Dispalce
 - Noise: Add Noise
 - Render: Clouds, Difference Clouds, Fibers, Lens Flare
 - Sharpen: Unsharp Mask, Smart Sharpen
 - Other: High Pass
 - Third party:
 - Topaz Labs: Adjust, Detail, Simplify
 - Nik Software: Color Efex Pro, Silver Efex Pro

Seldom used filter tool

- Fade command
 - Menu: Edit \rightarrow Fade...
 - Keyboard: Shift +Cmnd/Ctrl + f
 - Fades the effect of the filter you just used
 - Have to use it immediately after you use the filter

Edit	Image	Layer	Select	Filte
Und	do Poster		жz	
Ste	p Forward	☆ ¥ Z		
Ste	p Backwa	າະສz		
Fad	e Poster	Edges	Û	°₩F

		Fade
